

30 August

Hi Joanna,

KLC needs English-language industrial PR for North America and Europe, but the product story is technical: PTC ceramic heaters, EV high-voltage heaters, flexible heaters, and thermal-management solutions.

My plain opinion: the campaign will win or lose on media fit, not on a prettier press release. EV, HVAC, semiconductor, data-center, and industrial editors need different angles.

The page below lays out the PR angle process, outreach system, media-list method, reporting, pricing, and what I would treat as unknown until KLC shares internal data.

Allen
