

2 September

Hi Mushfiq,

You are not looking for an appointment-setting shop. You are asking for someone who can turn compliant outbound and partnerships into signed Gigafaze subscriptions, with payment tied to verified new MRR.

My view is that the first job is not more activity. It is choosing the strongest wedge for a live AI orchestration platform, then building the outbound, offer, and follow-up system around one buyer number.

A short plan is below this note, including how I would approach the first 90 days and where the risks are.

Allen
