Hi Dmitry,

You are not really hiring for brand management. The brief is asking for a commercial MarTech operator who can turn DKG's reports, databases, dashboards, indices, websites, and product assets into qualified leads.

My plain opinion: this is bigger than one channel specialist. It needs strategy, HubSpot architecture, segmentation, lifecycle email, landing pages, analytics, and enough hands-on execution to make campaigns repeatable across a broad portfolio.

The page below compares the full-time hire path with a done-for-you team path, then lays out a 90-day system for qualified leads.

Allen
