

10 September

Hi Terrance,

Terrance, the constraint is the strategy here: Maverick cannot lead with hormones or weight loss as standalone products. That changes the whole marketing system.

My view is that the strongest path is primary-care-first, with each provider account proving one part of the same promise: accessible, in-person care in Kern County that takes insurance.

The short plan below covers positioning, local SEO, reviews, paid search, content, compliance, and how I would split the work across the three provider voices.

Allen
