

10 September

Hi Tony,

Tony, your brief is very specific about the real constraint: a lean setup for a one-man Geelong buyers advocacy business, with geotargeting across Geelong, Bellarine, Melbourne, broader Victoria, and interstate search.

I think the main risk is not the ad build itself. It is launching before location tracking, calls, forms, GBP, Meta, and Google are clean enough to show which suburbs create enquiries.

The page below lays out the setup, the monthly option, recommended spend logic, and the reporting view for an easy fit check.

Allen
