Hello Tradiant team,

Tradiant is not asking for someone to lower CPMs or create more lead volume. The brief is about a predictable Meta acquisition engine that connects cold ads to activated trials, qualified calls, collected cash, and retention.

I think the hard part is not the media buying alone. It is keeping tracking, creative testing, retargeting, WhatsApp or email nurture, and sales-call feedback in one operating loop.

The page below lays out the 90-day plan, what we would own, what we would need from your team, and how the Growth pilot would work.

Allen
