

5 September

Hi Shelly,

Shelly, this role is asking one person to cover AI systems, HubSpot, Wix, landing pages, social platforms, product development, and B2B closing across agents, employers, and ESG buyers.

My view is that this is less risky as a small senior team than as one hire. The same month needs both systems work and signed agreements or LOIs.

The page lays out how we would run the first 90 days toward course enrollments, with the unknowns called out where analytics and internal context are private.

Allen
