Hello YPO Orange County team,

Your post is clear: YPO Orange County wants the manual email admissions process replaced with Airtable, Fillout, and a defined Phase 1 workflow.

My view is that the hard part is not just building 5 tables and 4 forms. It is keeping the 20-step process readable, testable, and usable for the people reviewing applicants.

The page below lays out how I would approach the MVP, what I would verify against the spec, and where Phase 2 should stay separate.

Allen
