Hello CyberEssentia team,

You are hiring for a remote B2B LinkedIn content and lead generation role around a cybersecurity cloud scanner service.

My plain opinion: this is a role where one freelancer can work, but the risk is usually the mix of skills. Content, targeting, outreach, email, and tracking all have to connect.

The page lays out how we would run that as a done-for-you team, including the first actions, 90-day system, pricing, and fit check.

Allen
