

5 September

Hi Evan,

Your post is clear on the real constraint: Wonderdog has transactional emails, but no lifecycle program across the 7 day trial window where users either convert or disappear.

My view is that the first win is not more campaigns. It is a trigger map with audience, timing, channel, and suppression rules, then the first priority flows written and shipped.

The page lays out how we would handle that as a done-for-you team instead of a single lifecycle hire, so you can judge the fit quickly.

Allen
