

30 August

Hi Kim,

You are hiring for a full-cycle Social Media Manager, but the real constraint is ownership after footage is sent. Raw WhatsApp or Dropbox clips need to become posts across Instagram, TikTok, and LinkedIn without you managing every step.

My view: this is closer to a content operating system than a single editor role, especially with IAmKimThan as the priority and Jamie running in parallel.

The page covers how we would run the first 90 days, including planning, scripting, editing, posting, reporting, and a path toward qualified PR leads.

Allen
