Hello TOUCHME team,

TOUCHME PERFORMANCE

You are not looking for developers, designers, or a software agency.

You need someone to launch acquisition for a built dating app in Poznań across Meta, TikTok, and Google App Campaigns.

I think the first mistake to avoid is optimizing for cheap installs before you can separate real registered and activated users from low-quality traffic.

The page covers how I would structure the first tests, what I would track, what the work would cost, and where the unknowns are until account data is visible.

Allen
