Hi Mathieu,

You are not hiring for random ad ideas. You need customer insight, performance data, reviews, VOC, competitors, and trends turned into briefs your team can test fast across Meta, TikTok, and Google.

I think the hard part is keeping tests clean while production keeps moving. The page below lays out the 90-day system for research, video, UGC, static briefs, workflow, and weekly calls on winners, losers, bottlenecks, and what to scale.

A short plan is below the note.

Allen
