Hi Annetta,

Annetta, your post is unusually clear: the problem is not volume. It is lead quality across a free masterclass funnel where 1,280 sign ups turned into 90 attendees and 3 ticket buyers.

My plain opinion is that the account should be judged on attendee rate, ticket buyers, and cost per buyer, not on \$4 to \$6 registrations. FREE can stay in the message, but the campaigns still need stronger buyer filters.

The short plan below shows how we would compare the hire path with a done-for-you Meta team for Digital Product Creators.

Allen
