Hello VEAUTY team,

You are hiring a full-time UGC Manager to own creator communication, sourcing, briefs, revisions, and final asset delivery as VEAUTY scales.

My view is that this role is really an operating system for creator output, not just a coordinator seat. One person can do it, but the risk is ramp-up time and a single point of failure.

The page lays out how we would run that creator engine as a done-for-you team, including the first fixes, the 90-day plan, pricing, and fit check.

Allen
