

3 September

Hi Abhishek,

You are not asking for a basic Google Ads setup. Ovaro needs someone who can own Performance Max, YouTube, Search, retargeting, tracking, funnel optimisation, CAC reduction, and scale.

My plain opinion: the first 30 days should prove where acquisition quality is coming from before pushing more budget into PMax or YouTube.

The page below lays out how I would approach the account, what would be delivered, and where the unknowns are because private analytics are not visible from the post.

Allen
