Hi Alexis,

You are not just hiring for posts. The role you described is a content execution engine: rolling 30-day calendar, 14-day buffer, daily feed, Stories, community management, creator assets, and monthly learning.

My view is that this is risky to put on one person unless the operating system is already very tight.

The page below shows how we would handle the Social Media and Content Manager outcomes as a done-for-you team for TRU, with the plan, pricing, and fit check in one place.

Allen
