

12 September

Hi Weston,

Conicia is live, paid, and has first subscribers, but nobody owns organic DTC growth yet. That is the real constraint I see in the post.

My opinion: this is not mainly a content calendar problem. It needs an operator who can run X, TikTok, Instagram, reels, creator outreach, and signup tracking inside Claude Code without needing a strategy deck approved every week.

The page below lays out how I would turn that into a measurable path to qualified leads, including the first actions, pricing, and fit check.

Allen
