

17 September

Hi Shaun,

Your RFP is really about control over the full case lifecycle, not just setting up Zoho fields. The Case has to carry lead intake, eligibility, Discovery, DTC processing, CRA filing, objections, invoicing, collections, documents, communications, and finance without becoming messy.

I think the risk is building workflows before the Case model, SLAs, roles, and exception paths are clear.

The page below lays out how I would approach the Zoho CRM, Creator, Desk, Analytics, Voice, Sign, Books, Mail, WorkDrive, and AI Tax Agent pieces so you can judge fit quickly.

Allen
