

2 September

Hi Yinan,

You are not asking for someone to just send cold emails. You need investor outreach and education outreach running in parallel, plus the Apollo, inbox, SPF/DKIM/DMARC, warmup, verification, and sequencing setup behind it.

I think the risk is treating this as a copy job when the real job is launch control: infrastructure, segmentation, deliverability, and reply quality all moving together.

The page below lays out how I would structure the first 90 days for Creatify so you can judge fit without guessing.

Allen
