Hi Nativ,

You are hiring someone to own the creator pipeline end to end: sourcing, onboarding, product shipping, content deadlines, internal review, invoices, and Notion status.

My view is that this role is mostly an operating system problem. Same-day creator replies and 90%+ on-time delivery need process, backup coverage, and clear ownership, not just a busy coordinator.

The page lays out how we would run that as a done-for-you team for NSY, including what we can know now and what needs your private account context.

Allen
