

11 September

Hi Brendan,

You are launching a 30-day nationwide Canadian Meta campaign for two new Denman Tea blends, with CAD \$5,000 in ad spend and about CAD \$2,000 set aside for the project fee.

My view is that the first risk is not media buying. It is launching before Shopify, Pixel, CAPI, creative angles, and reporting are tight enough to learn from the spend.

The page below lays out how we would run the campaign and where a smaller one-off build or audit may make more sense than a monthly team.

Allen
