Hi Lambros,

You are not asking someone to build the ad machine from zero. Meta, Google, TikTok, GA4, pixels, Shopify events, and the subscription funnel already matter because the next problem is conversion, not setup.

My opinion is that Low FODMAP meals needs discipline around the leaks first: bounce rate, add-to-cart, checkout completion, CPA, ROAS, and subscription signups.

The page below covers the launch conversion plan, the working rhythm, and the cost so you can judge fit quickly. A short plan is below the note.

Allen
