Hi Shantanu,

You are not hiring someone to just manage ad sets. The role needs full Meta ownership, creative testing, content gaps closed, and daily overlap with Singapore while the account moves toward SGD 50,000+ monthly spend.

My plain opinion: this is risky to solve with one person unless they are strong across buying, creative direction, UGC, reporting, and team rhythm.

The page lays out how TGE would cover the same outcomes as an embedded team, with the 90-day plan, deliverables, price, and fit check.

Allen
