Hi Yesenia,

You are not asking for a ClickFunnels page. You are asking for the full path from ad click to qualification, appointment setting, follow-up, CRM tracking, and sale handoff for a solar and electrical contractor in Puerto Rico.

I think that is the right way to frame it. A funnel that cannot separate residential from commercial intent, track source quality, and keep follow-up moving will create noise for sales.

The short page below shows how we would build the strategy, funnel, automation, tracking, and optimization path for qualified project inquiries.

Allen
