Hi Aaron,

Denver First

You are running First in Denver as a solo operator, and the role is not just newsletter help. It touches GHL lists and tags, dashboards, inbox triage, partner inquiries, scheduled sends, and weekly content formatting.

My plain opinion: this is risky to solve with one part-time generalist unless the operating system is very clear. The proposal below shows how we would cover the same outcomes with a small done-for-you team, then let you compare that against hiring.

Allen
