

16 September

Hi Stelios,

You are not just asking for Google Ads management. The hard part is separating prospective hosts from ticket buyers and existing users, then tracking the host journey properly.

my plain opinion: the first few days should be spent on waste and measurement, not new campaign ideas. Search, YouTube, Demand Gen, GA, and GTM all matter here because many hosts may not be actively searching yet.

I put the short plan on the page so you can judge fit quickly.

Allen
