Hi Humphrey,

You already have useful proof: 400-500 monthly gym sales, a TikTok shop, your wife's 50k following, and more influencers behind the brand.

The constraint is the 2-3 USD profit per unit. My view is that TikTok and Meta can work here, but only if the testing is built around margin, not just views.

The page below lays out the first fixes, the 90-day system, pricing, and what I would measure so you can judge fit quickly.

Allen
