Hello BGood team,

BGood needs one digital marketing track across SEO, SEM, SMM, and analytics, not four separate workstreams pulling in different directions.

My opinion: for honey spreads and natural honey, the first win is cleaner intent and tracking before heavier ad spend. Product SEO, Shopping, Meta creative, and remarketing need to share one measurement loop.

The page below covers the diagnosis, first actions, 90-day execution plan, proof, pricing, and a simple fit check.

Allen
